

AyDy Burling Prework

Assessments with live site links contain their own ReadMe. Please refer to the designated ReadMe for the assignment by clicking on the link to the Git Hub repo. This will provide you with further information. Thanks!

Table of Contents

1. HTML & Basic CSS Assessment:

- repo: <https://github.com/Dee1985/html-basic-css>
- live site: <https://dee1985.github.io/html-basic-css/>

2. CSS Assessment:

- repo: <https://github.com/Dee1985/css>
- live site: <https://dee1985.github.io/css/>

3. Bootstrap Assessment:

- repo: <https://github.com/Dee1985/bootstrap>
- live site: <https://dee1985.github.io/bootstrap/>

4. JavaScript Basics Assessment:

- No live site with this section.
 - Activity 1: Math quiz- using JS operators.
 - Questions are answered by using the console.
 - Activity 2: JavaScript Variables, Alerts, Prompts, and Conditionals
 - Questions are answered by using the console.
 - I decided to include additional reasoning for when a name is equal to the predetermined character limit. The instructions for the activity did not account for this particular condition. Since my name (AyDy) is 4 characters long, it is neither greater than nor less than the character limit of 4. Therefore, it seemed illogical (for me at least) to alert the user that names that are 4 characters long are anything other than equal to the character limit.
 - Activity 3: JavaScript Arrays and Loops
 - Questions are answered by using the console.

5. Module 1 Assessment: *Portfolio Template using Bootstrap*

- repo: <https://github.com/Dee1985/portfolio-bootstrap>
- live site: <https://dee1985.github.io/portfolio-bootstrap/>

6. Module 2 Assessment: *JS Word Guessing Game*

- repo: <https://github.com/Dee1985/which-witch>
- live site: <https://dee1985.github.io/which-witch/>
